Absolute Visibility

Boost your endpoint visibility—on and off your corporate network.
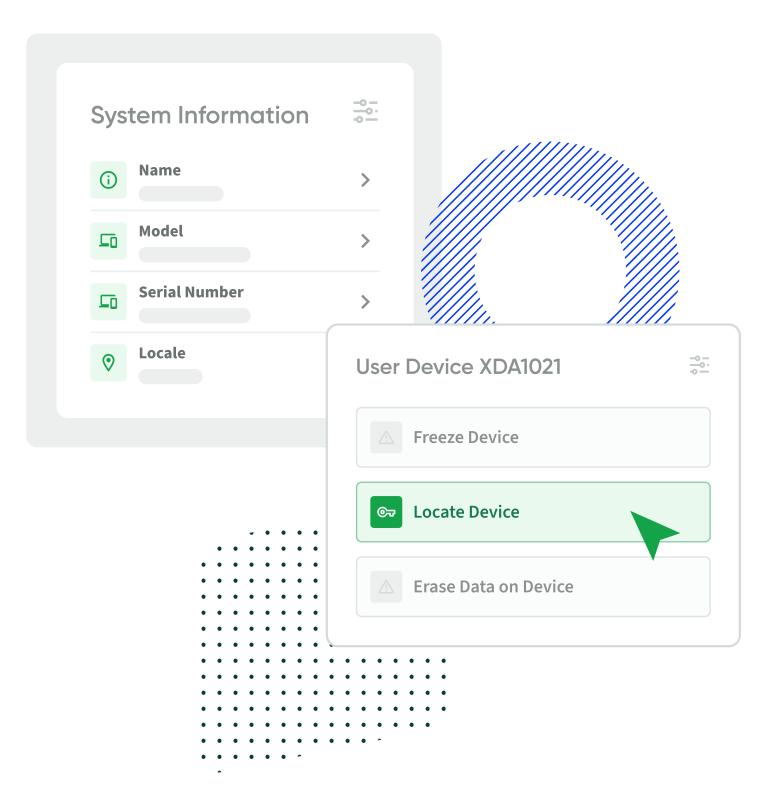

The work-from-anywhere era has given newfound significance to endpoint visibility. As employees operate in this new work-from-anywhere environment, alternating between campus and off-campus networks, your IT team will be challenged with inconsistent visibility, which in turn affects their ability to support and resolve user issues. In addition, endpoint visibility is crucial because most attacks begin on endpoints used by people — not the firewall or your servers. Typically, attackers gain control over these entry points to the network through techniques like phishing; from there, they can move laterally to access your servers.

Therefore, it's crucial to have visibility over all endpoints so you can identify issues before they escalate.

/ABSOLUTE®

Harvest the Power of the Absolute Platform

That's where Absolute Visibility™ helps, as it collects hundreds of data points about the endpoint's location, security posture, and hardware/software inventory. It provides analysis of software, Web applications, and hardware utilization and identifies potential failure points, sensitive data, and suspicious use patterns. You can view your entire device fleet from the cloud-based Absolute® Console or via the Absolute Mobile App, which are part of the **Absolute Platform**. Leveraging the always-on connection provided by Absolute Persistence® technology, which is embedded in more than 600 million devices from leading system manufacturers, you can trust that you're not missing anything. Whenever a user attempts to alter or remove it, Absolute reinstalls itself, ensuring crystal-clear visibility.

Absolute Visibility ensures uninterrupted visibility and unprecedented granularity of data across your endpoints, installed software, Web apps, and data — even if they're off your corporate network.

## Get the Truth from Your Devices, Apps, and Data

- ✅ **Report on Hardware Inventory** Keep hardware inventory always accurate, optimize lease management, and provide up-to-date reporting for governance purposes

- ✅ **Measure Device Usage** Identify and eliminate hardware waste, analyze usage patterns and prove ROI, and validate expected user behavior

- ✅ **Report on Installed Software** Keep software inventory always accurate (e.g., versioning), optimize license distribution, as well as detect and eradicate shadow IT

- ✅ **Gain Insights into Web App Usage** Identify Web subscription utilization, analyze Web app usage patterns and prove return on investment, and identify unauthorized or risky Web application usage

- ✅ **Identify Sensitive Information on Devices** Scan your endpoints for sensitive data like financial information, social security numbers, PII, PHI, and intellectual property to minimize risk exposure and strengthen compliance posture

- ✅ **Assess Device Security Posture** View device's encryption and anti-virus/anti-malware status, as well as detect any deviation in security efficacy to stay ahead of risks

- ✅ **Monitor Health of Critical Applications** Identify devices on which mission-critical applications are unhealthy or have been disabled, and initiate remediation based on findings

- ✅ **Track Device Location** Minimize supply chain risk for devices shipped from the factory, locate at-risk devices, as well as assist with device reclamation and locate devices during disasters

- ⚠ Erase Data on Device

Looking for a Bigger Toolbox?

While Absolute Visibility gives you a crystal-clear stream of data, the Absolute Secure Endpoint product portfolio offers you additional service tier options that might fulfill further business needs. Check out Absolute Control™ and Absolute Resilience™ to determine what service tier is right for you.

MOST POWERFUL

Absolute Visibility

Source of truth for device and application health.

What's Included
- ✓ Device Health
- ✓ Security Posture
- ✓ Device Usage
- ✓ Geolocation
- ✓ Web Application Usage
- ✓ Endpoint Data Discovery

ABSOLUTE VISIBILITY ADD-ONS
- ✓ **Absolute Insights for Endpoints**
  Empowers your admins with fleet-wide device and security trends.

RELATED PRODUCT PACKAGES
- ✓ **Absolute Visibility for Chromebooks**
  Specifically tailored capabilities for Chromebook users.

See Related Resources

Absolute Control

Lifeline to protect at-risk devices and data.

All Visibility capabilities, plus
- ✓ Geofencing
- ✓ Device Freeze
- ✓ File Delete
- ✓ Device Wipe
- ✓ End User Messaging
- ✓ Remote Firmware Protection

Absolute Resilience

Delivers application self-healing and confident risk response.

All Control capabilities, plus
- ✓ Application Health
- ✓ Application Resilience
- ✓ Remediation Script Library
- ✓ Investigations and Recovery of Lost/Stolen Devices

/ABSOLUTE®

Absolute Software makes security **work**. We empower mission-critical performance with advanced cyber resilience. Embedded in more than 600 million devices, our cyber resilience platform delivers endpoint-to-network access security coverage, ensures automated security compliance, and enables operational continuity. Nearly 21,000 global customers trust Absolute to protect enterprise assets, fortify security and business applications, and provide a frictionless, always-on user experience.
